ACADEMIC INSIGHTS PROGRAM

The National Institute of Education (NIE) Australia has partnered with Immerse Education to bring you the Academic Insights Program for

Medicine
Psychology
Veterinary Studies
Engineering
International Relations
Business Management, and
Creative Writing

The program will see students live and study at The University of Sydney between 3 ± 13 January 2024. Participants will attend lectures, tuitions, complete a research assignment, and be involved in an array of social and cultural activities. Students will live at St Paul's College (Uni of Sydney) for the duration of the program.

The academic components of the program will be facilitated by academics from Oxford and Cambridge Universities, who will fly in and stay for the 10-day duration of the program.

Students will receive a Certificate of Completion, a detailed personalised performance review, and personalised letter of recommendation, which they can use for applying to universities and various scholarship programs.

Program Inclusions:

- 10 nights' accommodation in a college at the University of Sydney
- Breakfast, lunch and dinner in College Hall
- Accommodation in an individual bedroom
- 35 hours of academic sessions from Oxford University and Cambridge University tutors
- Carefully designed study and lecture materials
- Mentor program and access to support material
- Formal hall dinners at the University of Sydney
- Visits to iconic landmarks including Sydney Opera House, Darling Harbour, and the Taronga Zoo
- Cultural and social activities including Australian Football, Cricket, and opportunities for BBQ
- Graduation ceremony and certificate
- A detailed evaluation written by the tutors
- Mentor family photograph
- Free premium membership to UniPrepare's 'Nurture' plan

Note: the cost of this program is \$9,690 (11 days inclusive). For detailed information about the cost and how to enrol please visit:

www.nie.edu.au/academicinsights-program

WILL ARTIFICIAL INTELLIGENCE REPLACE CERTAIN JOBS?

Chat GPT has recently been launched and this artificial intelligence and automation on jobs and how this will impact young people.

When we look at huge changes resulting from automation in the past (e.g., the industrial revolution), we know that there is usually a period of change to tasks, skills and jobs and that whilst some jobs become obsolete or the demand lessens, other jobs are usually created.

In terms of AI, for people who are tech savvy, programs like Chat GPT and Microsoft Copilot will have a beneficial impact on their jobs in occupations like business administration, business analytics, marketing, content creation, research, and finance.

It may have a detrimental impact on occupations like copywriting, editing, and strategic planning as people who are tech savvy and know how to utilise the functions of these programs may have a lesser need to engage with people who provide these services.

What does this mean for you?

It's crucial to recognise that AI is a permanent part of our technological landscape. We've already witnessed the launch of game-changing AI programs this year, and as this sector presents a lucrative opportunity for entrepreneurs, we can expect to see a steady stream of new programs in 2023 and beyond.

Not all occupations will be impacted, but if you are planning to move into an occupation that will will need to be able to keep up with changes in workplace tasks.

Workplaces will adapt to new technologies as they evolve and you will need to as well. Skills like digital literacy, understanding ethics, problem solving, critical thinking, collaboration, adaptability and technical skills will be essential.

JOBS IN ROBOTICS & AI

The team at Careers with STEM has written the following article for students interested in exploring careers in this exciting industry.

7 career and study pathways in robotics in AI

With the increasing accessibility of free AI platforms, fresh grads with AI skills are in serious demand. In Australia, just over 20% of startups say AI is relevant to what they do, and by 2030 we will need an extra 16,000 AI specialists to fill yet-to-be advertised jobs.

Not sure where to start with your studies? See our list of real-life AI role models doing incredible, innovative things in areas like machine learning, language, space, wildlife conservation and healthcare.

AUSTRALIAN DEFENCE FORCE ACADEMY

Students who would like to combine university study with a military lifestyle and career should consider applying for the Australian Defence Force Academy (ADFA), Canberra.

Students will receive a fully subsidised university degree from UNSW, a wage, and military training in the role you apply for.

Undergraduate degrees include:

Arts
Business
Engineering (Aeronautical, Civil, Electrical, and Mechanical)
Aviation

One of the best ways to develop ideas for occupations and courses is to participate in career events. Check the Career Newsletter for upcoming events and join social media accounts for any higher education provider or training institute you are currently interested in to ensure you are up to date with events. The following are events you may be interested in.
